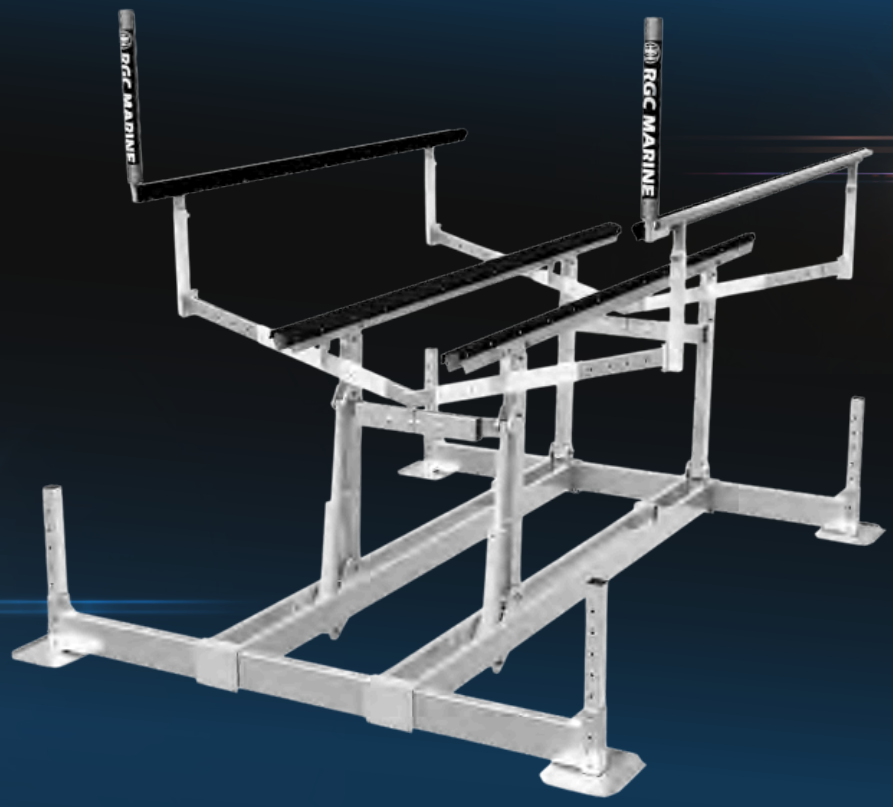
FLEX™ X2

2-CYLINDER 10K HYDRAULIC LIFT



ALL NEW REVOLUTIONARY DESIGN

DUAL CYLINDER

FASTER INSTALLATION

HIGHER CAPACITY

ADJUSTABLE WIDTH

This revolutionary 2-cylinder design redefines the future of boat lifts. Boasting a 12,000 lb. lifting capacity with only 2 hydraulic cylinders is just the beginning. With a 70% reduction in hardware and fewer parts, this hydraulic boat lift has been engineered for efficiency and value while delivering maximum performance.

FLEX™ X2

2-CYLINDER 10K HYDRAULIC LIFT

KEY FEATURES:

HIGHER CAPACITY – STREAMLINED ASSEMBLY

Lift more with less, saving you time and money.

Introducing the all-new FLEX™ X2 2-cylinder 10K hydraulic boat lift. This innovative new lift has been redesigned to lift up to 12,000* lbs. with JUST 2 hydraulic cylinders. It features streamlined assembly and installation and higher capacity to save you time and money.

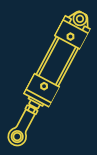
- **DUAL CYLINDER DESIGN** Two stainless-steel hydraulic cylinders utilize 3,000 psi to produce greater lifting power and higher capacity. This means you can lift more with less, increasing productivity and efficiency.
- **FAST ASSEMBLY** Two cylinders instead of four means less hardware, simplified hose routing, and easier assembly.
- **FEWER PARTS** This new FLEX™ hydraulic lift has been redesigned for efficient set up. With a 70% reduction in hardware it now has fewer parts to assemble, allowing your crew to accomplish more in less time, increasing your overall work capacity.
- **COMPETITIVELY PRICED** The reduction in parts allows us to offer this lift at a competitive price, allowing you to reach a more diverse customer base. In addition, fast set up and installation times provide you more leverage in competitive markets.
- **FLEX™ DESIGN** All FLEX™ Series boat lifts feature adjustable width which provides a precise fit for varying hull sizes making installation easier and faster. Lateral movement optimizes the distance in relation to the dock. Height can be adjusted with extension legs.

**Capacity: 12,000 lbs. at 48" lift height, 10,000 lbs. at 60" lift height and 8,000 lbs. at 72" lift height.*

Providing Innovative Engineering Solutions

Our goal is to provide innovative solutions to support your success in the continually evolving marine market. Our ongoing investment and engineering expertise bring you RGC Marine products that make your job easier, more efficient, and help you stay competitive.

What's New?



Dual Cylinder Design

Lift up to 12,000 lbs. with just two hydraulic cylinders. This lift has been engineered for maximum efficiency and performance.

Fast, Easy Assembly and Installation

70% reduction in parts saves you time and money. The streamlined design makes assembly fast and easy, increasing your crew's productivity.

Excellent Value and Performance

By allowing you to do more with less, this lift enables you to be more efficient and competitive while providing maximum reliable performance.

FLEX™ X2 Lift Specifications*:

Weight Capacity	Maximum Beam	Frame Width	Frame Length	Lift Arm Length	Minimum Bunk Height	Hydraulic Cylnders
12,000 lbs.	120 in.	141 in.	180 in.	48 in.	29 in.	2
10,000 lbs.	120 in.	141 in.	180 in.	60 in.	31 in.	2
8,000 lbs.	120 in.	141 in.	180 in.	72 in.	33 in.	2

Specifications for Model HLF 100120. X2 beam widths of 132" and 144" also available.

FLEX™ Features

Perfect Boat Fit

- Adjustable Width Bunks
- Precise fit for varying hull sizes
- Lateral Adjustment
- Height Adjustment

Superior Hydraulics

- Dual Cylinder Design
- Stainless-steel cylinders and fittings
- Resists corrosion and lasts longer
- Bronze scrapers keep the shaft clean

Hydraulic Control Box

- Corrosion and water-resistant pump
- Lithium Battery Ready for longer life
- Water-resistant, lock-ready housing
- Designed for maximum efficiency

Stainless-Steel Braided Hoses

- Protect against abrasion
- Protect against cutting
- Resists damage from zebra mussels
- Lasts longer

Pontoon/Tritoon Bunk Kits

Designed specifically for wider boats, the FLEX™ pontoon and tritoon bunk kits provide greater width adjustments.

Full Guide-Ons

Guides and protects boats on entry and exit. Ensures proper positioning on the lift.

Bow Stop

Securely positions the boat over the lift for easy docking even in rough waters.

Vertical Guide Posts

Properly positions the boat over the lift while providing a visual reference point.

Solar Power

Eliminates the need to access shore power and charges the battery safely with clean, free low-maintenance solar power.

Boat Lift Canopy

A boat lift canopy provides the ultimate protection from sun damage and weather elements. Keeps boaters dry and cool in the shade.
